in the 1630s the netherlands was gripped by tulipmania a speculative fever unprecedented in scale

and as popular history would have it folly we all know the outline of the story how otherwise sensible merchants nobles and artisans spent all they had and much that they didn't on tulip bulbs we have heard how these bulbs changed hands hundreds of times in a single day and how some bulbs sold and resold for thousands of guilders never even existed tulipmania is seen as an example of the gullibility of crowds and the dangers of financial speculation but it wasn't like that as anne goldgar reveals in tulipmania not one of these stories is true making use of extensive archival research she lays waste to the legends revealing that while the 1630s did see a speculative bubble in tulip prices neither the height of the bubble nor its bursting were anywhere near as dramatic as we tend to think by clearing away the accumulated myths goldgar is able to show us instead the far more interesting reality the ways in which tulipmania reflected deep anxieties about the transformation of dutch society in the golden age goldgar tells us at the start of her excellent debunking book most of what we have heard of tulipmania is not true she tells a new story simon kuper financial times

the world is chiral most of the molecules in it are chiral and asymmetric synthesis is an important means by which enantiopure chiral molecules may be obtained for study and sale using examples from the literature of asymmetric synthesis this book presents a detailed analysis of the factors that govern stereoselectivity in organic reactions after an explanation of the basic physical organic principles governing stereoselective reactions the authors provide a detailed annotated glossary of stereochemical terms a chapter on practical aspects of asymmetric synthesis provides a critical overview of the most common methods for the preparation of enantiomerically pure compounds techniques for analysis of stereoisomers using chromatographic spectroscopic and chiroptical methods the authors then present an overview of the most important methods in contemporary asymmetric synthesis organized by reaction type thus there are four chapters on carbon carbon bond forming reactions one chapter on reductions and one on oxidations carbon oxygen and carbon nitrogen bond forming reactions this organization allows the reader to compare the leading methods for asymmetric synthesis in an appropriate context a highlight of the book is the presentation and discussion of transition states at the current level of understanding for important reaction types in addition extensive tables of examples are used to give the reader an appreciation for the scope of each reaction finally leading references are provided to natural product synthesis that has been accomplished using a given reaction as a key step authoritative glossary to aid
