the fifth report of the international committee on taxonomy of viruses ictv summarizes the proceedings and decisions reached by the ictv at its meetings held at the international congresses of virology in sendai 1984 edmonton 1987 and berlin 1990 this report has been organized in the same way as the previous ones wildy 1971 fenner 1976 matthews 1979 1982 yet it encompasses many more families and groups of viruses than previous reports and it includes new tables diagrams and keys the officers and members of the ictv study groups

from 1984 to 1990 are listed as the current ictv statutes and rules of nomenclature information on the format for submission of new taxonomic proposals to the ictv is also provided since the fourth report of the ictv 1982 19 new virus families and groups have been described this report includes 2 430 viruses belonging to 73 families or groups as well as virus satellites and viroids descriptions but it does not include descriptions not approved by the ictv it now will be possible to publish such preliminary and in some cases controversial descriptions in the virology division pages of the archives of virology this will allow virologists to carry on the kind of interim dialogue that is necessary for arriving at broad agreement on taxonomic matters
