be made to fit the child rather than the child being pushed through the sausage factory education systems as it currently stands the book is packed with practical ideas that have been tried and tested in a real school and have proved popular with staff parents and pupils and ofsted it considers all aspects of learning and teaching in the primary school and provides useful questions for the reader to consider their own working practices in the context of personalising learning

this book explores a new pedagogical model called the third model which places the encounter between the child and the curriculum at the center of educational theory and practice the third model is implemented in an alternative classroom called community of thinking teaching and learning in a community of thinking is based on three stations the fertile question research and concluding performance the essence of a community of thinking is the formation of a group of students and teachers who grapple with a troubling question to which they do not know the answer at the outset and sometimes even at the end of their investigation the community of thinking framework is supported by a whole school model the intel lect school the model or parts of it is currently implemented in schools in israel england australia and new zealand the book suggests a new pedagogical narrative based on alternative atomic pictures of learning teaching knowledge mind and the aim of education and a systematic pedagogical practice based on this narrative

effective peer learning between professionals and between students alike it locates this phenomenon in current conceptions of learning and teaching far removed from traditional ideas of one way transmission of knowledge exactly what happens to promote learning by teaching is explored examples of learning by teaching are discussed and it is noted that this happens in school university and the workplace as well as through the internet learning by teaching within the student body is then explored and many different methods described the organizational features needed to improve learning by teaching consciously and deliberately are investigated these can be before teaching during teaching or after teaching evidence based practical guidance is given of course teachers can deploy learning by teaching for themselves but what if they also organize their students to teach each other thereby giving many more opportunities to discuss practise explain and question this takes pedagogical advantage of the differences between students turning classrooms into communities of learners where students learn both from their teacher and from their peers
