an unsettling account of the events ideas and minds behind the nameless political movement that governs america today the movement transcends political parties has no formal structure no acknowledged leaders and no sworn loyalty except to god whose will it interprets according to its fears and desires yet it is not an abstraction it elects our presidents and legislatures and informs their decisions while in office the movement started at the end of world war ii when nuclear weapons the holocaust and then the cold war led to the fear of mass death that infected american views of justice ethics and global politics it gradually replaced the new deal as conversations with religious and political leaders churchgoers and pollsters make clear after 9 11 the nation became increasingly pessimistic americans more than ever embraced simplistic self serving solutions to questions of personal and national destiny to regain the best in the american character we must recognize the existence of a new national movement define it

in this classic work of feminist political thought iris marion young challenges the prevailing reduction of social justice to distributive justice the starting point for her critique is the experience and concerns of the new social movements that were created by marginal and excluded groups including women african americans and american indians as well as gays and lesbians young argues that by assuming a homogeneous public democratic theorists fail to consider institutional arrangements for including people not culturally identified with white european male norms consequently theorists do not adequately address the problems of an inclusive participatory framework basing her vision of the good society on the culturally plural networks of contemporary urban life young makes the case that normative theory and public policy should undermine group based oppression by affirming rather than suppressing social group differences provided by publisher

americans dissatisfaction with government is at an all time high drawing on an inside track on washington leading political pollster gordon black paints a compelling portrait of a government out of control and provides persuasive evidence that a new party could get it back on track 50 60 charts graphs tables

at the beginning of the twenty first century countries in the middle east and north africa contend with the threats and opportunities of economic globalization the driving force of change in the contemporary world as the authors confirm in their straightforward and at times irreverent analysis of the regions response to these challenges it is globalization which is the key to an understanding of economic reform through an investigation of the structures of state and civil society including financial systems they also demonstrate that there is a direct correlation between economic performance and democratization in other words the more liberal the polity the more effective is its economy in responding to globalization with its interesting and incisive approach to the politics and economics of the middle east and north africa this will be an essential purchase for students and policy makers and anyone trying to come to grips with economic globalization generally

in the days and weeks following the tragic 2011 shooting of nineteen arizonans including congresswoman gabrielle giffords there were a number of public discussions about the role that rhetoric might have played in this horrific event in question was the use of violent and hateful rhetoric that has come to dominate american political discourse on television on the radio and at the podium a number of more recent school shootings have given this debate a renewed sense of urgency as have the continued use of violent metaphors in public address and the dishonorable state of america s partisan gridlock this conversation unfortunately has been complicated by a collective cultural numbness to violence but that does not mean that fruitful conversations should not continue in the politics of resentment jeremy engels picks up this thread examining the costs of violent political rhetoric for our society and the future of democracy the politics of resentment traces the rise of especially violent rhetoric in american public discourse by investigating key events in american history engels analyzes how resentful rhetoric has long been used by public figures in order to achieve political ends he goes on to show how a more devastating form of resentment started in the 1960s dividing americans on issues of structural inequalities and foreign policy he discusses for example the rhetorical and political contexts that have made the mobilization of groups such as nixon s silent majority and the present tea party possible now in an age of recession and sequestration many americans believe that they have been given a raw deal and experience feelings of injustice in reaction to events beyond individual control with the politics of resentment engels wants to make these feelings of victimhood politically productive by challenging the toxic rhetoric that takes us there by defusing it and by enabling citizens to have the kinds of conversations we need to have in order to fight for life liberty and equality

the politics of the textbook analyzes the political economic and cultural factors that shape the production distribution and reception of school texts

how did we get into this mess every morning many americans ask this as with a cringe they pick up their phones and look to see what terrible thing president trump has just said or done regardless of what he s complaining about or whom he s attacking a second question comes hard on the heels of the first how on earth do we get out of this alan wolfe has an answer in the politics of petulance he argues that the core of our problem isn t trump himself it s that we are mired in an age of political immaturity that immaturity is not grounded in any one ideology nor is it a function of age or education it s in an abdication of valuing the character of would be leaders it s in a failure to acknowledge even welcome the complexity of government and society and it s in a loss of the ability to be skeptical without being suspicious in 2016 many americans were offered tantalizingly

simple answers to complicated problems and like children being offered a lunch of pop rocks and coke they reflexively and mindlessly accepted the good news such as it is is that we ve been here before wolfe reminds us that we know how to grow up and face down trump and other demagogues wolfe reinvigorates the tradition of public engagement exemplified by midcentury intellectuals such as richard hofstadter reinhold niebuhr and lionel trilling and he draws lessons from their battles with mccarthyism and conspiratorial paranoia wolfe mounts a powerful case that we can learn from them to forge a new path for political intervention today wolfe has been thinking and writing about american life and politics for decades he sees this moment as one of real risk but he s not throwing up his hands he s bracing us we ve faced demagogues before we can find the intellectual maturity to fight back yes we can

americans are as smart responsible and generally good as they have ever been yet our politics is careening out of control the politics of crazy how america lost its mind and what we can do about it is an effort to explain the forces that have undermined responsible responsive politics and point the way toward a more solid future
