this study extends the long established notion of grass s danzig trilogy to that of the danzig quintet a literary project of epic proportions which explores the evolution of germany s relationship to its nazi past over a period of forty years the interlocking stories of *die blechtrommel* 1959 *katz und maus* 1961 *hundejahre* 1963 *örtlich betäubt* 1969 and *im krebsgang* 2002 are mediated by the memory and language of seven first person narrators using the dual conceptualisation of memory developed by freud and lacan reliving versus recollecting the past the author shows how these narrators accounts assert the reality of the holocaust as well as german wartime suffering while highlighting the reluctance of ordinary germans to admit their involvement in the nazi regime this delineation of the complex relationship of three generations to their history is deepened by the intertextual nature of the quintet using the theory of peter brooks umberto eco shoshana felman and hayden white the study explores how grass s textual strategies encourage the reader to view all five works as one overarching narrative while simultaneously avoiding any literary or historical closure in the process the study places each book in the context of its moment of production and also considers the implications of grass s belated admission in august 2006 that he served with the waffen ss during the final months of world war two
