mapping motivation for top performing teams is the final volume in a series of books that are all linked to the author s motivational map toolkit each book builds on a different aspect of personal team and organisational development

this book using the motivational map the team motivational map as well as the organisation motivational map is a practical guide to understanding how team dynamics and success are hugely influenced by motivational factors which are not usually taken into account the book is a deeper exploration of team mapping which occurs in chapter 6 of mapping motivation 2015 chapter 6 of mapping motivation for engagement with steve jones 2019 and chapter 6 of mapping motivation for leadership with jane thomas 2020 but whereas these chapters only touched on specific aspects of team dynamics this book covers the issues more comprehensively it also attempts to avoid replication of materials although there are bound to be small overlaps it covers not only how motivations affect team productivity and how this can be boosted through targeted reward strategies but also how mapping provides profounder insights into the four key characteristics of top performing teams the clear remit vital interdependency strong belief and real accountability how motivational maps covers these areas we believe to be original eye opening and effective in the management of change further as always with motivational maps its language and metrics raise self awareness at an individual and team level and so can help resolve conflicts through its common and non judgmental language managing teams is the key skill of managers thus this book is a handbook for managers everywhere who wish to excel at management for without bringing their teams on board i e motivating their teams they are not effectively managing

we may think we know what defines religious fanaticism violent action undertaken with dogmatic certainty but the term fanatic from the european reformation to today has never been a stable one then and now it has been reductively defined to justify state violence and to delegitimize alternative sources of authority unknowing fanaticism rejects the simplified binary of fanatical religion and rational politics turning to renaissance literature to demonstrate that fanaticism was integral to how both modern politics and poetics developed from the german peasants revolt to the english civil war the book traces two entangled approaches to fanaticism in this long reformation moment the targeting of it as an extreme political threat and the engagement with it as a deep epistemological and poetic problem in the first thinkers of modernity from martin luther to thomas hobbes and john locke positioned themselves against fanaticism to pathologize rebellion and abet theological and political control in the second which arose alongside and often in response to the first the poets of fanaticism investigated the link between fanatical self annihilation the process by which one could become a vessel for divine violence and the practices of writing poetry edmund spenser john donne and john milton recognized in the fanatic s claim to be a passive instrument of god their own incapacity to know and depict the origins of fanaticism yet this crisis of unknowing was a productive one it led these writers to experiment with poetic techniques that would allow them to address fanaticism s tendency to unsettle the boundaries between human and divine agency and between individual and collective bodies these poets demand a new critical method which this book attempts to model a historically minded and politicized formalism that can attend to the complexity of the poetic encounter with fanaticism
