a brief historical account of the background leading to the publication of the first four editions of the world directory of crystallographers was presented by g boom in his preface to the fourth edition published late in 1971 that edition was produced by traditional typesetting methods from compilations of biographical data prepared by national sub editors the major effort required to produce a directory by manual methods provided the impetus to use computer techniques for the fifth edition the account of the production of the first computer assisted directory was described by s c abrahams in the preface of the fifth edition computer composition which required a machine readable data base offered several major advantages the choice of typeface and range of characters was flexible corrections and additions to the data base were rapid and once established it was hoped updating for future editions would be simple and inexpensive the data base was put to other union uses such as preparation of mailing labels and formulation of lists of crystallographers with specified common fields of interest the fifth edition of the world directory of crystallographers was published in june of 1977 the sixth in may of 1981 the subject indexes for the fifth and sixth editions were printed in 1978 and 1981 respectively both having a limited distribution

this new volume in a highly regarded established series provides complete coverage of the heterocyclic chemistry of isoxazoles

the 10th edition of the world directory of crystallographers and of other scientists employing crystallographic methods is a revised and up to date edition of the world directory and contains the current addresses academic status and research interests of over 8000 scientists in 74 countries it is produced directly from the regularly updated electronic world directory database which is accessible via the world wide full details of the database are given in an annex to the printed edition
