this model course describes guidelines for training using an engine room simulator specified as one method of demonstrating competence in column 3 of the tables a iii 1 a iii 2 a iii 4 a iii 6 and a iii 7 except the function controlling the operation of the ship and care for the persons on board at the operational level management level

this imo model course provides guidance to achieve the standards of competence set out in table a vi 1 2 of the stcw code

this model course aims to assist instructors in the design and delivery of port facility security officer pfso training courses by linking the knowledge required to competently perform the duties and responsibilities of a pfso as identified in msc 1 circ 1188 guidelines on training and certification for port facility security officers 22 may 2006 to the relevant guidance material contained in the guide to maritime security and the isps code 2012 edition and identifying opportunities to increase the level of knowledge in certain key areas of responsibility

the course includes technical aspects of teaching that have a direct relation with the maritime simulator world without delving into the details at this stage it is however emphasized that the simulator pedagogy as well as psychology of learning forms an important element of the course the topics that have been covered in this modular course have been chosen in such a way as to provide a valuable introduction for those who have little experience in teaching and also as a very useful refresher for experienced instructors in addition those whose teaching experience has been limited to lecturing will gain considerable exposure as they will explore the world of

maritime simulation along with a variety of teaching techniques the course deals with the relevance of simulator in maritime training and the simulator pedagogy associated with the use of training on a maritime simulator the basic aspects of the learning process purpose of training setting of training objectives and basic principles of course design and the psychology of learning has also been touched upon however it does not form the main thrust of the course it is assumed that course participants would have received formal training in these aspects prior to completing this programme the course has a large practical component in which the participants implement the theoretical guidelines by planning creating executing and evaluating their own simulation exercises the experimental nature of the course being conducted largely using simulators provides the participants the opportunity to hone the necessary skills required to be an effective simulator instructor

this course should be taken by every prospective seafarer it covers training in personal survival techniques and is based on the provisions of table a vi 1 1 of the stcw code

this basic course provides training to navigation officers to operate ships in polar waters and to address those additional provisions deemed necessary for consideration beyond existing requirements of the solas and marpol conventions in order to take into account the climatic conditions of polar waters and to meet appropriate standards of maritime safety and pollution prevention
