The lingua franca role of English coupled with its status as the official language of ASEAN has important implications for language policy and language education. These include the relationship between English, the respective national languages of ASEAN and thousands of local languages. How can the demand for English be balanced against the need for people to acquire their national language and mother tongue while many will also need a regional lingua franca? They are learning English as the first foreign language from primary school in all ASEAN countries. Might not this early introduction of English threaten local languages and children's ability to learn or can English be introduced and taught in such a way that it can complement local languages rather than replace them? The aim of this book is to explore questions such as these and then make recommendations on language policy and language education for regional policymakers. The book will be important for regional policymakers and language education professionals. It should also benefit language teachers, especially but by no means exclusively English language teachers. The book will be of interest to all who are interested in the development of English as an international language and the possible implications of this upon local languages and cultures. Andy Kirkpatrick is chair professor of English as an international language at the Hong Kong Institute of Education and director of the institute's research centre into language education and acquisition in multilingual societies. His research interests include the development of regional varieties of English and the history of Chinese rhetoric. Much research has been carried out on varieties of English used in Southeast Asia but how intelligible these varieties are to others and whether a shift towards an international standard variety occurs in interactions between people from the region has been much less discussed. This volume provides a comprehensive account of the roles and functions of English in ASEAN and gives a linguistic description of the English spoken in the region.

seminar paper from the year 2007 in the subject english language and literature studies culture and applied geography grade 2 0 martin luther university institut für anglistik und amerikanistik course english rules the world the globalisation of english language english abstract the role of the english language among all other languages is constantly examined researched and written about it appears that no other language has ever had such an amazing and massive impact on other cultures languages and world history statements like english is today a truly global language rubdy 2006 5 and world english exists as a political and cultural reality crystal 2003b xii underpin the notion of the possibility of a language that

connects all people a notion and perhaps also a wish that is almost as old as mankind this paper will investigate the question of what defines a language as a global one and what factors are convincing or definite david crystal s explanation makes it quite obvious a language achieves a genuinely global status when it develops a special role that is recognized in every country crystal 2003b 3 however he himself admits that this is not precise enough a special role can mean many things the concept usually refers to political aspects like for example the status of the language of the state defined by law or the language being the only one in some states for historical reasons cf crystal 2003b 66 but in all cases it can be argued the population is living in an environment in which the english language is routinely in evidence publicly accessible in varying degrees and part of the nation s recent or present identity crystal 2003b 66 it also has to be clarified what processes can lead to a global status of a language and if so called naïve theories hold true for the purpose of examining this question further the concept of the lingua franca and the role of english as such will also be looked at talking about english and its world influence it is inevitable to consider the roles and history of britain and the united states in order to make the attempt of getting more precise numbers of speakers will be shown and it will be explained how these numbers came about and what they mean as obvious as it may seem english is dominant in so many spheres that it appears impossible to account for all of them thoroughly however the most significant domains will be explained as such in order to draw a connection between history present and future
