this rich and magisterial work traces palestine s millennia old heritage uncovering cultures and societies of astounding depth and complexity that stretch back to the very beginnings of recorded history starting with the earliest references in egyptian and assyrian texts nur masalha explores how palestine and its palestinian identity have evolved over thousands of years from the bronze age to the present day drawing on a rich body of sources and the latest archaeological evidence masalha shows how palestine s multicultural past has been distorted and mythologised by biblical lore and the israel palestinian conflict in the process masalha reveals that the concept of palestine contrary to accepted belief is not a modern invention or one constructed in opposition to israel but rooted firmly in ancient past palestine represents the authoritative account of the country s history

the task of compressing the last two thousand years of palestinian history has been achieved here through impressive research through the archaeological record and ancient manuscripts chapters included are from the roman conquest to 70 c e roman era continued 70 to 305 the advance of the cross byzantine rulers 3985 to 564 and much more many of the earliest books particularly those dating back to the 1900s and before are now extremely scarce and increasingly expensive we are republishing these classic works in affordable high quality modern editions using the original text and artwork

science a four thousand year history rewrites science s past instead of focussing on difficult experiments and abstract theories patricia fara shows how science has always belonged to the practical world of war politics and business rather than glorifying scientists as idealized heroes she tells true stories about real people men and some

women who needed to earn their living who made mistakes and who trampled down their rivals in their quest for success far sweeps through the centuries from ancient babylon right up to the latest hi tech experiments in genetics and particle physics illuminating the financial interests imperial ambitions and publishing enterprises that have made science the powerful global phenomenon that it is today she also ranges internationally illustrating the importance of scientific projects based around the world from china to the islamic empire as well as the more familiar tale of science in europe from copernicus to charles darwin and beyond above all this four thousand year history challenges scientific supremacy arguing controversially that science is successful not because it is always right but because people have said that it is right
