conflicting identities and multiple masculinities takes as its focus the construction of masculinity in western europe from the early middle ages until the

fifteenth century crossing from pre christian scandinavia across western christendom the essays consult a broad and representative cross section of sources including the work of theological scholastic and monastic writers sagas hagiography and memoirs material culture chronicles exempla and vernacular literature sumptuary legislation and the records of ecclesiastical courts the studies address questions of what constituted male identity and male sexuality how was masculinity constructed in different social groups how did the secular and ecclesiastical ideals of masculinity reinforce each other or diverge these essays address the topic of medieval men and through a variety of theoretical methodological and disciplinary approaches significantly extend our understanding of how in the middle ages masculinity and identity were conflicted and multifarious

first published in 1997 this is volume iii of selected works of jean piaget which explores his concepts on the origins of intelligence in children the theses developed in this volume concern in particular the formation of the sensorimotor schemata and the mechanism of mental assimilation

jean piaget was one of the most salient and inspirational figures in psychological and educational research of the 20th century he was also prolific authoring or editing over 80 books and numerous journals and papers which spawned a continuation of his work over the following decades his work now comprises a major component of many courses on children s psychological development and in a research tradition which is expanding scholars may need access to the original texts rather than secondhand accounts this volume is the third of nine reproducing piaget s original works they are also available as a boxed set

this book deals with the origins of intelligence in children and contains original observations on young children novel experiments brilliant in their simplicity which the author describes in detail piaget divides the growth of intelligence into six sequential stages the use of reflexes the first acquired adaptations and primary circular reaction secondary circular reactions and the child s procedures for prolonging spectacles interesting to him

what is most impressive about this book is its intelligence its sophistication and its charm this book presents piaget s work and his person better than anything else that i know about david elkind tufts university the tone is one of constant movement from the most ordinary to the most abstruse there are 14 conversations with le patron some in 1969 some in 1975 and several more with co workers in various fields in mr bringuier s book in a pleasant informal way we see a sophisticated non scientist exploring piaget s domain with the master some of piaget s best known findings about children as explained along the way but mr bringuier has ways of bringing out the relation of this psychological work to the whole of piaget s enterprise and we get a good sense of the man and his work howard e gruber new york times book review

first published in 1999 this book brings together the ideas of theoretician marvin minsky and philosopher pierre teilhard de chardin provencal s theory inverts minsky s society of the mind into the mind of society giving a new and firm basis to the teilhardian idea of noosphere and allowing for unsuspected transdisciplinary regularities between several scientific domains including physics biology and anthropology provencal aims to show that a very special type of global planetary consciousness is emerging and to explain better the way in which human ideas constitute a global auto organizing system

in the course of their researches for mental imagery in the child 1971 the authors came to appreciate that action may be more conducive to the formation and conservation of images than is mere perception this raised the problem of memory and its relation to intelligence which they examine in this title originally published in english in 1973 through the analysis primarily of the child s capacity for remembering additive and multiplicative logical structures and his remembrance of causal and spatial structures the authors investigate whether memories pursue their own course regardless of the intelligence or whether in specified conditions mnemonic improvements may be due to progress in intelligence they examine the relationship between the memory s figurative aspects from perceptive recognition to the memory image and its operational aspects the schemata of the intelligence and stress the fundamental significance of the mnemonic level known as the reconstructive memory this was a pioneering work at the time presenting illuminating conclusions drawn from extensive research together with a number of constructive ideas which opened up a fresh approach to an important area of educational psychology

in november 2001 james e loder jr professor of the philosophy of christian education for forty years at princeton theological seminary suddenly died he was a creative and profound thinker who had just completed a promising book in it he developed a compelling interdisciplinary model to disclose how the divine spirit affirms reconstitutes and transforms the human spirit to bring new energy and creativity into human experience he called it redemptive transformation you now hold that book in your hands those who know loder s work are confident that educational ministry in the logic of the spirit though delayed for over fifteen years will still become the best introduction to his complex thought more important it offers the imaginative means by which we may learn to attune ourselves and our faith communities to what god is doing in our fractured distracted and self destructive world to bring about a revolution of love the fruit of christ s spirit and the center of our human vocation
