this collection of essays by twenty one distinguished american historians reflects on a peculiarly american way of imagining the past at a time when history writing has changed dramatically the authors discuss the birth and evolution of historiography in this country from its origins in the late nineteenth century through its present more cosmopolitan character in the book s first part concerning recent historiography are chapters on exceptionalism gender economic history social theory race and immigration and multiculturalism authors are daniel rodgers linda kerber naomi lamoreaux dorothy ross thomas holt and philip gleason the three american centuries are discussed in the second part with chapters by gordon wood george fredrickson and james patterson the third part is a chronological survey of non american histories including that of western civilization ancient history the middle ages early modern and modern europe russia and asia contributors are eugen weber richard saller gabrielle spiegel anthony molho philip benedict richard kagan keith baker joseph zizak volker berghahn charles maier martin malia and carol gluck together these scholars reveal the unique perspective american historians have brought to the past of their own nation as well as that of the world formerly writing from a conviction that america had a singular destiny american historians have gradually come to share viewpoints of historians in other countries about which they write the result is the virtual disappearance of what was a distinctive american voice that voice is the subject of this book

this comprehensive title is among the first to extensively use newly released 2010 u s census data to examine multiculturalism today and tomorrow in america this distinction is important considering the following npr report by eyder peralta based on the first national numbers released by the census bureau the ap reports that minorities account for 90 percent of the total u s growth since 2000 due to immigration and higher birth rates for latinos according to john logan a brown university sociologist who has analyzed most of the census figures the futures of most metropolitan areas in the country are contingent on how attractive they are to hispanic and asian populations both non hispanic whites and blacks are getting older as a group these groups are tending to fade out he added another demographer william h frey with the brookings institution told the washington post that this has been a pivotal decade we re pivoting from a

white black dominated american population to one that is multiracial and multicultural multicultural america a multimedia encyclopedia explores this pivotal moment and its ramifications with more than 900 signed entries not just providing a compilation of specific ethnic groups and their histories but also covering the full spectrum of issues flowing from the increasingly multicultural canvas that is america today pedagogical elements include an introduction a thematic reader s guide a chronology of multicultural milestones a glossary a resource guide to key books journals and internet sites and an appendix of 2010 u s census data finally the electronic version will be the only reference work on this topic to augment written entries with multimedia for today s students with 100 videos with transcripts from getty images and video vault the agence france press and sky news as reviewed by the media librarian of the rutgers university libraries working in concert with the title s editors

the passionate arguments and offer a clear distanced vision of the changing character of history they explain how history has usually been viewed through the lens of the present and demonstrate with sparkling historiography that the discipline is as contemporary as the headlines of today as vital as the problems of tomorrow

the arrival of immigrants on america s shores has always posed a singular problem once they are here how are these diverse peoples to be transformed into americans the americanization movement of the 1910s and 1920s addressed this challenge by seeking to train immigrants for citizenship representing a key element of the progressives search for order in a modernizing america frank van nuys examines for the first time how this movement in an effort to help integrate an unruly west into the emerging national system was forced to reconcile the myth of rugged individualism with the demands of a planned society in an era convulsed by world war and socialist revolution the americanization movement was especially concerned about the susceptibility of immigrants to un american propaganda and union agitation as van nuys convincingly demonstrates this applied as much to immigrants in the urbanizing and industrializing west as it did to those occupying the ethnic enclaves of cities in the east in americanizing the west he tells how hundreds of bureaucrats educators employers and reformers participated in this movement by developing adult immigrant education programs and how these attempts contributed more toward bureaucratizing the west than it did to turning immigrants into productive citizens he deftly ties this history to broader national developments and shows how westerners brought distinctive approaches to americanization to accommodate and preserve their own sense of history and identity van nuys shows that although racism and social control agendas permeated americanization efforts in the west americanizers sustained their faith in education as a powerful force in transforming immigrants into productive citizens he also shows how some westerners especially in california believed they faced a racial frontier unlike other parts of the country in light of the influx of hispanics and asians so that westerners became major players in the crafting of not only american identity but also immigration policies the mystique of the white pioneer past still maintains a powerful hold on ideas of american identity and we still deal with many of these issues through laws and propositions targeting immigrants and alien workers americanizing the west makes a clear case for regional distinctiveness in this citizenship program and puts current headlines in perspective by showing how it helped make the west what it is today

since the 1950s and the advance of urban renewal local governments and urban policy have focused heavily on the central business district however such

development has all but ignored the inner city neighborhoods that continue to struggle in the shadows of high rise america this analysis of urban neighborhoods in the united states from 1960 to 1995 presents fifteen essays by scholars of urban planning and development together they show how urban neighborhoods can and must be preserved as economic cultural and political centers
