engage pupils interest and imagination with these thirty six stand alone lesson plans these thought provoking activities are suitable for pupils of all abilities and will also help improve their literacy skills includes differentiation and extension activities time saving photocopiable resources easy to use flexible lesson plans

in a world of rapidly changing knowledge which requires new and transferable skills classrooms are increasingly being viewed as places where pupils learn how to learn in order to help pupils develop new skills teachers must encourage them to work independently and manage themselves as learners learning for themselves offers teachers a repertoire of effective strategies and frameworks to nurture independent learning the chapters are organised into four broad areas learning preferences thinking inquiry personal challenges each section includes learning tasks covering commonly addressed topics in primary school curriculums with each task designed to be adapted by students and teachers to suit particular interests and a range of teaching and learning goals photocopiable learning proformas for each task and additional proforma resources are included to assist teachers and pupils when planning managing monitoring and keeping records associated with independent learning saving valuable planning time for teachers this book offers a creative and effective way to encourage pupil independence and will appeal to all teachers who aim to equip their pupils with transferable skills

in a secret war waged in worlds both virtual and real the fates of nations depend on the definitive weapon and that weapon is knowledge knowledge to die for the race is heating up between the u s and china to develop a quantum computer with infinite capabilities to crack any enemy s codes yet keep secure its own secrets the government that achieves this goal will win a crucial prize no other computer system will be safe from the reach of this master machine dr jaron kwok was working for the u s government to build such a computer but in a posh hotel in hong kong a chinese policewoman sifts through the bizarre ashlike remains of what s left of the doctor with the clock ticking alliances will be forged and there are those who will stop at nothing to discover what the doctor knew as the search for answers intensifies it becomes chillingly clear that the quantum computer both sides so desperately want will be more powerful more dangerous than anyone could have ever imagined for in the twenty first century machines become gods gods become machines and the once impossible now lies within reach the key to unlimited knowledge will create the ultimate weapon of mass destruction or humanity s last chance to save itself from the trade paperback edition

an essential addition wegerif zooms in on the most important ingredient of all in a learning to learn classroom culture the kinds of talk that are allowed and encouraged and brings together both scholarly and practical approaches in a highly fruitful and accessible way guy claxton author of building learning power what s the point of school and new kinds of smart this is a thought provoking and readable book which makes a very good case for the importance of teaching thinking skills and encouraging creativity through dialogue professor neil mercer university of cambridge uk author of words and

minds and dialogue and development there is growing interest in developing flexible thinking and learning skills in the primary classroom but there has been little agreement as to exactly what these skills are and how best to teach for them this innovative book responds to that challenge with a coherent account of what thinking and creativity are and how they can be taught taking a dialogic approach it shows how engaging children in real dialogue is possible in every area of the curriculum and how this can lead to more reflective considerate and creative children who are able to think for themselves and to learn creatively wegerif explores the success of approaches such as philosophy for children thinking together dialogic teaching and building learning power using illustrations and activities he explains how teaching and learning across the primary curriculum can be transformed this book is important reading for all primary teachers and trainees who are looking for practical ideas for teaching thinking it will also be valuable for anyone who wants to understand education and think more about what is most important in education
