the luria nebraska neuropsychological battery is a relatively new neurodiagnostic test and there is a growing demand for material on the more advanced aspects of its interpretation this book organized around the theoretical meaning of items the empirical correlations between items and the factor structure of the individual scales is a first response to that demand it will serve to give greater understanding of the psychological skills that underlie each item on the luria nebraska battery an understanding prerequisite to the techniques of syndrome analysis described in the writings of a r luria and it will be particularly useful to those who have limited experience with actual case material the major part of the book is an analysis of each luria nebraska scale either item by item or as a unit for each scale the authors examine

the theoretical intent of the items and the underlying skills according to Luria's theory they then present the results of item interrelations analysis to determine whether the items tap common skills finally they describe the factor structure of the various scales exploring the interrelations of items within each scale in addition to analyzing the behavioral scales of the Luria-Nebraska battery the book reviews a number of other empirical scales that further aid interpretation particularly the experimental localization scales that tap focal deficits in specific areas of the brain also included are case histories that illustrate the process of diagnosis in patients who receive a series of Luria-Nebraska batteries over the course of their treatment finally the authors briefly discuss subcortical disorders an issue often ignored in clinical neuropsychological testing
