this book comes at a time when the egyptian nation is facing deep divisions about the notion and definition of revolution the articles here aim to look at the 2011 egyptian revolution and the central role of women within it from a critical perspective our objective is not to glorify the revolution or inflate the role of egyptian women within its parameters but to analyse and critique both the achievements and setbacks of this revolution and the contributions of various strata of women to the revolutionary process which is still unfolding women's participation is part of a broader picture and needs to be considered as an essential element of the ongoing struggle for freedom and social justice not in isolation of it the reader will soon realise that the authors in this book perhaps agree on one profound aspect of the 2011 revolution the struggle is ongoing and the revolutionary process is still being shaped and recreated the story of the egyptian revolution still resists any kind of closure despite the ascendance of the military regime once again to power the years to come will no doubt witness an expansion of the political and cultural archive of the egyptian and arab uprisings accompanied by much academic work on their impact and significance women's roles and contributions need to occupy a central position in these academic analyses this book was originally published as a special issue of the journal for cultural research

this book challenges the correspondence theory of judicial fact construction that legal rules resemble and subsume facts out there and instead provides an account of judicial fact construction through legally produced times or adjudicative temporalities that structure legal subject and event formation in legal judgement drawing on bergsonian and gadamerian theories of time this book details how certain adjudicative temporalities can produce fully willed and autonomous subjects through time framed legal events in effect the paradigmatic liberal legal subject or how alternative adjudicative temporalities may structure legal subjects that are situated and constituted by social structures the consequences of this novel account of legal judgement are fourfold the first is that judicial fact construction is not exclusively determined by the legal rule s but by adjudication s production of temporalities the second is that the selection between different adjudicative temporalities is generally indeterminate though influenced by wider social structures as will be argued social structures framed as a particular type of past produced by certain adjudicative temporalities may either be incorporated in the rendering of the legal event or elided the third is that with the book s focus on criminal law different deployments of adjudicative temporalities effect responsibility ascription finally it is argued that the demystification of time as that which structures event and subject formation reveals another way in which to uncover the politics of legal judgement and the potential for its transformative potential through either its inclusion or its elision of social structures in adjudication s determination of facts this book will be of interest to students and scholars in the field of legal judgement legal theory and jurisprudence

it is clear by now that the label arab spring has proven too simplistic to describe the uprisings that upended the political order of the arab world in late 2010 brutal crackdowns and civil conflict in syria libya and yemen dashed the hopes that peaceful democratic revolutions would sweep the region in other countries the departure of authoritarian leaders led to many false starts without producing democratic conclusions societies that had appeared united in opposition suddenly seemed fractious youth were once again banished to the political margins reconstructing the middle east examines the changes that happened within the region from 2010 and the long term challenges and opportunities they present featuring the work of authors with a diversity of perspectives most of whom hail from the region it addresses key issues of political economic and societal changes the role of young people and of the international community in addition the book deals with the questions of both political and economic reform and the intertwined nature of the two political reform that allows greater participation will fail to quell frustration if arabs continue to feel that their job prospects are bleak similarly arabs will not accept economic reform that restores growth but continues to fence off the political sphere this book offers a unique perspective on the uprisings by focusing on specific issue areas where change is needed and offering a roadmap for the long road towards state building and new social contracts based on political inclusion respect for pluralism and sustained economic growth as such it will be a valuable resource for students and scholars of middle east politics as well as those with an interest in the arab spring
