this book brings together recent and ongoing empirical studies to examine two relational kinds of politics namely the politics of nature i e how nature conservation

projects are sites on which power relations play out and the politics of the scientific study of nature these are discussed in their historical and present contexts and at specific sites on which particular human environment relations are forged or contested this spatio temporal juxtaposition is lacking in current research on political ecology while the politics of science appears marginal to critical scholarship on social nature specifically the book examines power relations in nature related activities demonstrates conditions under which nature and science are politicised and also accounts for political interests and struggles over nature in its various forms the ecological socio political and economic dimensions of nature cannot be ignored when dealing with present day environmental issues nature conservation regulations are concerned with the management of flora and fauna as much as with humans various chapters in the book pay attention to the ways in which nature science and politics are interrelated and also co constitutive of each other they highlight that power relations are naturalised through science and science related institutions and projects such as museums botanical gardens wetlands parks and nature reserves

the scientific bibliography of the waterberg makgabeng plateau blouberg and soutpansberg follows two similar bibliographies of other mountain areas of south africa this bibliography is particularly relevant as it covers many disciplines in two recently declared biosphere reserves by unesco namely waterberg and vumbie

peace parks are imagined landscapes and seascapes created through narratives and science this book uses a political ecology framework to explore the colonial and uneven geography of peace parks in post independence africa it illuminates the regional milieus impacting these parks and the consequent socioecological and political dynamics this book curates a space for multiple voices and knowledges of peace parks and highlights the limits to truth claims it presents peace parks as a milieu that enables the assemblage of underexamined concepts in political ecology the book advances four arguments the first is that critical scholarship on the peace parks initiative in africa and elsewhere has been crowded out by a dominant and well sponsored narrative of these parks second the ideology of peace parks capitalises on societal aspirations and challenges to wage the war of the mind third peace parks are a geographical expression of coloniality the fourth argument is that the regional dynamics account for the uneven geography of peace parks in africa these dynamics reveal the symbiotic relations between politics and ecology the founding of peace parks animates resource politics but also depoliticises the resource question situated in the ongoing debates on protecting the planet in an unequal world and the pathways for a just society this book will be of interest to researchers of african studies political ecology human geography sociology environmental studies and political science

a comprehensive assessment of the innovation system of south africa focusing on the role of government

the year 2013 marked the 100th anniversary of the 1913 land act in south africa which legalised the violent dispossession and alienation of the african majority from the land it is common cause that the alienation of land for conservation purposes introduced to africa under colonial rule has continued more or less uninterrupted until today however while nature conservation practices inevitably raise challenging questions relating to land and land use there has thus far been little concentrated effort to bring together scholars working on the land question particularly around issues of land tenure with those whose work focuses on questions of nature construction and the social impacts of conservation in an african context compiled from research presented at a ground breaking interdisciplinary conference held at rhodes university in grahamstown south africa in 2012 the chapters in this book made their first appearance in a special issue of the journal of contemporary african studies jcas in july 2013 the book brings critical interdisciplinary analyses of the complex interrelations between contemporary neoliberal conservation practices in post colonial africa into conversation with the well trodden territory of land use and contested land issues on the continent anchored by an intellectual curiosity about the extent to which past practices continue into the present and with what consequences the book provides fresh insights into the complex relationship between land and conservation in contemporary africa

south africa s struggle in balancing its domestic needs while playing a dynamic developmental role in the african region and global context exposes a complex web of relations shaped by its geostrategic location on the continent and the world and the staggering legacies of colonialism and apartheid as such understanding the complexities of the global economy and of south africa s place in it is of great importance this book builds upon an existing body of literature which has demonstrated that while the post apartheid south african state has recast its nation building goals with advances having been made notably in the area of a stellar post apartheid constitution policy directives and democratic political integration economic integration and policy implementation presents a projection of captured interests where big business concerns are entrenched in the post apartheid state s apparent neo liberal turn the main focus of the book is to contextualise issues relating to three main trends in global discourses on development which are significant for south africa and indeed for the study of the political economy of regional development in the country from the prism of south africa as a global capitalist state these trends include the impact of globalisation regionalisation and the marginalisation of south africa and indeed the african continent in the global economy thus unpacking the possible role that south africa might play in regional development this volume will be a valuable resource to academics researchers and students in the fields of regional studies economics and political theory as well as policymakers planners and local economic development practitioners
