The book catalogues the 200 species of medicinal plants most commonly used in traditional Vietnamese medicine. The book, which has been translated from the original Vietnamese, was produced in an effort to communicate knowledge about herbal medicine that has accumulated over thousands of years. It has been confirmed through both empirical experience and scientific evaluation and yet has rarely been published outside the Vietnamese literature. It also responds to increasing respect for the value of medicinal plants as a source of efficacious and inexpensive new drugs that offer an important alternative to chemically synthesized medicines. The book has three main parts. The first part describes research in Vietnam conducted on medicinal plants in line with the national policy of developing a system of medicine and pharmacy that integrates the modern and traditional systems. The second part, which constitutes the core of the book, describes and illustrates the 200 most valuable species of wild and cultivated medicinal plants in Vietnam. Each plant species is first documented by a full-color drawing illustrating the plant's distinctive features and natural colors. Explanatory notes for each species provide a concise description of the plant and give local names, flowering period, geographical distribution, parts used, chemical composition, and therapeutic uses. Information on indications and dosage is also provided to facilitate retrieval of information. The third part indexes plant species according to botanical name, Vietnamese name, and English name.

Evidence-based validation of herbal medicines. Translational research on botanicals brings together current thinking and practice in the characterization and validation of natural products. The book describes different approaches and techniques for evaluating the quality, safety, and efficacy of herbal medicine, particularly methods to assess their activity and understand compounds responsible and their probable underlying mechanisms of action. This book brings together the views, expertise, and experiences of scientific experts in the field of medicinal plant research. Hence, it will be useful for researchers who want to know more about the natural lead with their validation and also useful to exploit traditional medicines. Includes state-of-the-art methods for detecting, isolating, and performing structure elucidation by degradation and spectroscopic techniques. Highlights the trends in validation and value addition of herbal medicine.
