an international conference on therapeutic psychological and research aspects of amyotrophic lateral sclerosis was held in Varese Italy from the 27th to the 31st March 1985. Health care professionals, scientists, patients and their families from twenty countries around the world participated in this meeting. The objectives of the Varese conference were the following:

- to provide a forum for the proponents of the various paths of research into ALS
- to correlate the useful therapies employed regionally for the purpose of developing a common guide for patients, families and supporting professionals
- to encourage self-examination by the health care professionals into the psychological barriers imposed by a diagnosis of terminal illness for which there is no known cause or cure.

Not surprisingly, there were no announcements of breakthroughs or miracle cures, which are nonetheless hoped for in the confrontation of a disease such as ALS. It is fair to say, however, that Varese provided the context for a thorough review of what is known about ALS and we hope that the papers will renew some of the enthusiasm which has characterized this conference. The book contains six sections: basic research, aspects of diagnostic tools, clinical management, therapeutic trials, psychological aspects and the epidemiology of ALS. Certain aspects such as pathological studies and animal models have not been covered; these subjects were partially treated during the informal sessions. Nevertheless, the large number of papers bears evidence to the growing interest in ALS and to the success of the Varese meeting.

The gold standard physical medicine and rehabilitation text is now in its fourth edition with thoroughly updated content and a more clinical focus. More than 150 expert contributors, most of them new to this edition, address the full range of issues in contemporary physical medicine and rehabilitation and present state-of-the-art patient management strategies, emphasizing evidence-based recommendations. This edition has two separate volumes on physical medicine and rehabilitation medicine. Each volume has sections on principles of evaluation and management, management methods, major problems and specific disorders. Treatment algorithms and boxed lists of key clinical facts have been added to many chapters.

Some vols also contain reports of cases in the General Court of Virginia.

A record of literary properties sold at auction in the United States.
