jatropa proves to be a promising biofuel plantation and could emerge as a major alternative to diesel thus
reducing our dependence on oil imports and saving the precious foreign exchange besides providing the
much needed energy security jatropa oil displacing conventional fossil fuel makes the related project fully
eligible the jatropa plantation primarily focuses cultivated green biodiesel as an alternate source of fuels
that can propel engines generators and transportation as well as power generation in the future and replace
existing sources the main factor that makes the major difference is the cost of the bio fuel that it can be
made cheaper than the petro diesel and on a long term basis without affecting the operational economics
