galileo s dictum that the book of nature is written in the language of mathematics is emblematic of the accepted view that the scientific revolution hinged on the conceptual and

methodological integration of mathematics and natural philosophy although the mathematization of nature is a distinctive and crucial feature of the emergence of modern science in the seventeenth century this volume shows that it was a far more complex contested and context dependent phenomenon than the received historiography has indicated and that philosophical controversies about the implications of mathematization cannot be understood in isolation from broader social developments related to the status and practice of mathematics in various commercial political and academic institutions contributors roger ariew u of south florida richard t w arthur mcmaster u lesley b cormack u of alberta daniel garber princeton u ursula goldenbaum emory u dana jalobeanu u of bucharest douglas jesseph u of south florida carla rita palmerino radboud u nijmegen and open u of the netherlands eileen reeves princeton u christopher smeenk western u justin e h smith u of paris 7 kurt smith bloomsburg u of pennsylvania
