in a mixture of travel adventure and scholarship historian tudor parfitt sets out in search of answers to a fascinating ethnological puzzle is the lemba tribe of southern africa really one of the lost tribes of israel descended from king solomon and the queen of sheba beginning in the lemba villages in south africa where he witnesses customs such as food taboos and circumcision rites that seem part of jewish tradition parfitt retraces the supposed path of the lembas through zimbabwe malawi and tanzania taking in sights like zanzibar and the remains of the stone city great zimbabwe the story of his eccentric travels a blend of the ancient allure of king

solomon s mines and prester john with contemporary africa in all its beauty and brutality makes for an irresistible glimpse at a various and rapidly changing continent and in a new epilogue parfitt discusses recent dna evidence that amazingly lends credence to the lemba s tribal myth

most of us probably think of america as being settled by british protestant colonists who fought the indians tamed the wilderness and brought democracy or at least a representative republic to north america to the contrary elizabeth caldwell hirschman s research indicates the earliest settlers were of mediterranean extraction and of a jewish or muslim religious persuasion sometimes called melungeons these early settlers were among the earliest nonnative americans to live in the carolinas tennessee kentucky virginia and west virginia for fear of discrimination since muslims jews indians and other persons of color were often disenfranchised and abused the melungeons were reticent regarding their heritage in fact over time many of the melungeons themselves forgot where they came from hence today the melungeons remain the last lost tribe in america even to themselves yet hirschman supported by dna testing genealogies and a variety of historical documents suggests that the melungeons included such notable early americans as daniel boone john sevier abraham lincoln jefferson davis and andrew jackson once lost but now forgotten no more

tudor parfitt examines a myth which is based on one of the world s oldest mysteries what happened to the lost tribes of israel christians and jews alike have attached great importance to the legendary fate of these tribes which has had a remarkable impact on their ideologies throughout history each tribe of israel claimed descent from one of the twelve sons of jacob and the land of israel was eventually divided up between them following a schism which formed after the death of solomon ten of the tribes set up an independent northern kingdom whilst those of judah and levi set up a separate southern kingdom in 721bc the ten northern tribes were ethnically cleansed by the assyrians and the bible states they were placed in halah and in habor by the river of gozan and in the city of medes the bible also foretold that one day they would be reunited with the southern tribes in the final redemption of the people of israel their subsequent history became a tapestry of legend and hearsay

the belief persisted that they had been lost in some remote part of the world and there were countless suggestions and claims as to where

most of the jewish nation was lost thousands of years ago no trace of them has ever been discovered in this startling book a close examination of japanese traditions suggests the possibility that the japanese are the descendants of the ten lost tribes of israel
