provides the knowledge and insights necessary to contribute to the information systems decision making process managing using information systems a strategic approach delivers a solid knowledgebase of basic concepts to help mba students and general business managers alike become informed competent participants in information systems is decisions now in its eighth edition this fully up to date textbook explains the fundamental principles and practices required to use and manage information while illustrating how information systems can create or obstruct opportunities and even propel digital transformations within a wide range of organizations drawing from their expertise in both academia and industry the authors discuss the business and design processes relevant to

is while presenting a basic framework that connects business strategy is strategy and organizational strategy step by step readers are guided through each essential aspect of information systems from fundamental information architecture and infrastructure to cyber security artificial intelligence ai business analytics project management platform and is governance is sourcing and more detailed chapters contain mini cases full length case studies discussion topics review questions supplemental readings and topic specific managerial concerns that provide insights into real world is issues managing using information systems a strategic approach eighth edition is an excellent textbook for advanced undergraduate and mba level courses on is concepts and managerial approaches to leveraging emerging information technologies

this second edition has retained the clear easy to read writing style and managerial perspective of the previous edition the book employs two important themes throughout the strategy theme focuses readers on information systems goals and the action theme emphasizes the roles of people in information systems balancing technical issues with managerial issues

the editors include a wide range of contemporary and classic articles from north america and the uk on key information systems management themes including it developments in business and outsourcing information systems services

the authors know information systems knowledge is essential for creating competitive firms managing global corporations providing useful products services to customers one of the central new themes in the revision focuses on helping managers make better decisions about technology to achieve maximum value

this book focuses its coverage in terms of a systems analysis approach developed with the help of students framework new real world cases and more extensive coverage of electronic commerce hypertext java and other current topics

this fully revised and updated second edition of information systems strategic management continues to provide an accessible yet critical analysis of the strategic aspects of information systems the second edition again covers the relevant practical and theoretical material of information systems supported by extensive case studies student activities and problem scenarios the iss issues will be fully integrated into current thinking about corporate strategy addressing the fact that a range of emerging strategic issues are often ill addressed in is strategy books which also fail to differentiate between it the application of technology and is the participative human centred approaches to information and knowledge management specific changes include expansion and internationalisation of case studies broader focus beyond social and critical theory new chapters on strategy and e business strategic management as a technical or social process strategic implications of information security applications portfolio and technology management the focus on strategic issues and the integration of it and is issues ensures this text is ideal for mba students studying mis as well as being suitable for msc students in is it

management information systemstakes a management perspective towards is identifying the issues of organisation and strategy that managers face as they decide how to

respond to technological opportunities the book draws on extensive research to present a distinct organisational perspective on the management of information systems following the argument that managing successive projects as part of a coherent organisational process rather than as isolated technological events will produce an information system that enhances broader strategy the book also includes many case studies which will enable readers to understand and resolve practical and strategic challenges it is written for students on undergraduate and postgraduate degree programmes or undertaking professional qualifications

concepts are presented in clear non technical jargon presents proven strategies for integrating it with business strategies to create competitive advantages for organizations current readings and links bring basic issues up to date with examples of how successful managers implement it

for use as a capstone course text in mis and in management of information technology systems courses this text deals with the management of information technology it as it is being practiced in organizations today its emphasis is on the current material that information systems executives find important and organizes it around a framework that provides guidance to students in this sixth edition the key themes are the internet economy the global marketplace e enablement knowledge management and knowledge sharing it continues to merge theory with practice through case examples of real companies use of it

this comprehensive compendium is about managing information systems and focuses on relationships between information systems people and business the impacts roles risks challenges as well as emerging trends of information systems are an important element of the book essential and critical information systems management skills including using information systems for competitive advantages planning and evaluating information systems developing and implementing information systems and managing information systems operation form a critical part of this unique reference text current topics like digital platforms agile organization devops blockchain 5 computing prove indispensable for readers who want to stay in the forefront of today's complex information systems

describes the role of information systems in business internal organization of the information systems department and current information systems technology and theory are explored but the emphasis is on real life management issues casebook available

during the last three decades information and communication technologies have fundamentally changed the way we work live and communicate the ubiquity of internet services which become increasingly interactive and complex together with enhanced connectivity facilitated by innovative mobile devices induces an ever rising demand for computing storage and data transmission capacities today information systems constitute the backbone of the globalized economy and are indispensable for modern business and production processes at the same time environmental sustainability has evolved as the most pressing societal challenge of the 21st century in particular due to the looming threats of climate change by virtue of their global influence and reach

business companies significantly contribute to the creation of environmental problems but owing to their organizational knowledge capabilities and resources they also have the capacity and ability to play a key role in shaping the path towards a more sustainable development the companies leading the way have noticed that corporate sustainability is not necessarily a burden that negatively impacts their bottom line if strategically managed environmental product and process innovations can decrease operational costs enhance corporate reputation and differentiate from competitors with regard to environmental sustainability is play a contradictory role on the one hand the manufacturing operation and disposal of information technology it infrastructure are responsible for serious environmental impacts from the mining of conflict minerals to carbon dioxide emissions that equal those of the airline industry to enormous amounts of toxic e waste on the other hand is are perceived as key enablers of a green economy environmental management systems and the reengineering of business processes can substantially reduce the environmental impacts of business organizations while technological innovations provide opportunities to decrease the ecological footprint of end user products and services many organizations have started to implement first environmental measures to decrease it energy consumption and to reduce operational costs mostly in an unstructured and uncoordinated manner though although green is practices feature a considerable potential to increase corporate environmentalism while creating promising business opportunities the adoption of enterprise wide cross functional initiatives aimed at implementing green is has been rather slow economic uncertainties regarding the long term effects of green is adoption and the lack of appropriate management frameworks have been identified as main inhibitors of an encompassing implementation of green is initiatives throughout the enterprise in this context this thesis addresses relevant research gaps contributes to theory development in the evolving green is research discipline develops practice oriented management frameworks and emphasizes the importance of following a strategic approach to leverage the competitive potential of green is this cumulative thesis comprises an introduction that includes a literature review and a pre study four theory based conceptual research articles and two empirical studies one of them building on qualitative exploratory case study research whereas the other relies on quantitative data which has been analyzed with structural equation modeling this thesis targets four specific research goals to advance theory building in green is research and to promote the adoption of green is in practice first this thesis clarifies and defines the central terms and key concepts green it green is green is strategy and green is practices drawing on a transdisciplinary research approach second the most important challenges and inhibitors of green is adoption are identified and characterized in particular the lack of management frameworks which encourage a holistic implementation that follows a strategic rationale the complexity of strategic green is alignment the multi dimensional performance impacts of cross functional initiatives and above all the uncertainty relating to the business case of green is practices are identified as the most pressing challenges third current actions of business firms to address these challenges are examined building on exploratory case study research distinctive green is strategies are identified in managerial practice most notably the empirical insights from quantitative survey research suggest a positive relationship between green is adoption and firm competitiveness thus decreasing the economic uncertainty which inhibits the implementation of far reaching environmental

initiatives fourth practice oriented management frameworks are developed the fine grained green is strategy concept advises the formulation of strategies addressing the corporate competitive and functional management level the proposed typology of four green is strategies illustrates distinct strategic options from which executives can choose under consideration of their competitive targets and the firm specific context to allow for consistency of green is strategies the presented alignment framework facilitates coherence with economic and environmental corporate goals furthermore the actors roles and responsibilities relevant to the alignment process are described in addition a management framework for the holistic adoption of green is which specifies decisive management areas and distinguishes between three degrees of environmental impacts is presented along with a comprehensive catalogue of green is implementation measures as a consequence this research offers both empirical insights and conceptual models to advance the adoption of green is initiatives thus meeting the challenges of climate change and turning corporate sustainability into a business opportunity informationssysteme is zeigen in bezug auf ökologische nachhaltigkeit gegensätzliche eigenschaften einerseits verursachen die herstellung der betrieb sowie die entsorgung von informationstechnologie it infrastrukturen schwerwiegende negative umweltauswirkungen vom abbau von kohlendioxidemissionen bis hin zu betriebsabfällen andererseits werden is als schlüsseltechnologien für eine nachhaltige wirtschaft gesehen umweltmanagementsysteme und die umgestaltung von geschäftsprozessen können den ökologischen fußabdruck von organisationen bedeutend verringern zudem eröffnen technologische innovationen neuartige m products und dienstleistungen über den gesamten lebenszyklus zahlreiche organisationen haben damit begonnen ein implementieren um den energieverbrauch und operative kosten zu senken allerdings verfolgen die meisten unternehmen hierbei keinen strukturierten oder strategischen ansatz obwohl green is initiativen beachtliche potentiale zur verbesserung der nachhaltigkeit von organisationen bieten und gleichzeitig vielversprechende wirtschaftliche chancen eröffnen schreitet die umsetzung von bereichsübergreifenden green is maßnahmen in unternehmen nur langsam voran ökonomische und soziale rentabilität derartiger maßnahmen sowie der mangel an adäquaten management frameworks werden in diesem zusammenhang als zentrale hinderungsgründe für eine strategische und ganzheitliche umsetzung von green is initiativen identifiziert diese dissertation adressiert diese hinderungsgründe schafft schlüsselkonzepte für den neuen green is forschungszweig entwickelt praxisorientierte management frameworks und hebt die bedeutung eines strategischen ansatzes bei der implementierung von green is hervor diese forschungsarbeit offeriert empirische einblicke wie auch konzeptionelle modelle um die umsetzung ganzheitlicher green is initiativen in organisationen voranzutreiben unternehmen haben somit die chance den herausforderungen des klimawandels verantwortungsvoll zu begegnen und gleichzeitig durch eine nachhaltige unternehmensführung wettbewerbsvorteile zu generieren
