ando's well researched comparison of Japanese automobile and pharmaceutical investment in Europe not only provides a compelling demonstration of the strategic and organizational diversity of contemporary Japanese multinationals but illustrates the challenges faced by all multinationals by the complex and multi-faceted process of European integration. Geoffrey Jones, Harvard Business School, US. This book explores the regional strategy and management of Japanese MNCs in Europe. Ken Ichi Ando investigates using case studies of the auto and pharmaceutical industries how these companies can and do overcome the inherent difficulties and opportunities of trading in Europe including the problems posed by cultural differences and geography alongside the opportunities of expanding markets. While these companies are global players they must increasingly be aware of and evolve in response to European economic integration. The strategy setting and management are influenced by company and industry specific factors and some common features can be found. The locational and entry strategies are based both on the multinationals' own resources and capability and on the changing locational conditions. While pan-European management is conducted to achieve the benefits of multinationality at the regional level the mutual relationships between the location of subsidiaries, the entry mode and the pan-European operation are clearly shown from the detailed analysis at the company level. The impacts and limits of the EU on multinationals are also confirmed in the book and the importance of national characteristics is suggested. Scholars and graduate students studying international business and economics as well as European integration will find this book of great interest.

This thoughtful and comprehensive book represents the best work I have seen on the current situation concerning medication policies in the EU. It is not just that this is a very up-to-date compendium of facts and data across a wide variety of domains that impact on pharmaceutical regulation; the book is also strong on analysis of those facts as well. Jerry Avorn, Harvard Medical School. This book offers a comprehensive examination of approaches to manage pharmaceutical expenditures in Europe. It is a must-read for those who seek to understand and navigate the changing regulatory environment for medicines in the European Union. Bernie O'Brien, McMaster University, Canada. The rising cost of pharmaceutical expenditures in many European countries is of concern to governments required to make effective use of health care budgets. Taking a broad perspective that encompasses institutional, political and supranational aspects of pharmaceutical regulation, this book examines approaches used to manage pharmaceutical expenditure across Europe and what impact these strategies have had on efficiency, quality, equity and cost of pharmaceutical care. Regulating pharmaceuticals in Europe is an important book for students of health policy, regulation and management and for health managers and policy makers. The editors, Elias Mossialos and Brian Abel-Smith, professor of health policy at the London School of Economics and Political Science and a research director of the European Observatory on Health Systems and Policies.
