of gothic architecture in spain look inside the book seeing then
how complete is the ignorance which up to the present time we have
laboured under as to the true history and nature of gothic
architecture in spain i commit this volume to the reader with a

fair trust that what has been the occupation of all my leisure moments for the last two or three years a work not only of much labour at home but of considerable labour also in long journeys taken year after year for this object alone will not be found an unwelcome addition to the literature of christian art i believe that for a day and a half our mayoral never slept a wink and spent something like a fourth of his time running with the mules though i am bound to say that subsequent experience has convinced me that he was exceptionally lively and wakeful for elsewhere in travelling by night i have generally found that the mules become their own masters after dark walking or standing still as seemeth them best and seldom getting over much more than half the ground they travel in the same number of hours of daylight about george edmund street the author 11 charles locke eastlake writing in 1872 saw this as a prime example of the revolt from english national style that was occurring amongst gothic revival architects at this time at least in part inspired by john ruskin s enthusiasm for the medieval architecture of northern italy and by the publication of viollet le duc s exhaustive dictionnaire raisonne de l architecture franchise du xie au xvie siecle his work was not exclusively in the gothic revival manner as is demonstrated by ralli s dramatic lycian byzantine temple at norwood cemetery the romanesque reworking of the nearby church of st luke and the rebuilding of all saints at roydon in west norfolk in a style to match its two norman doorways

a survey of the built environment distills the work of legendary author and illustrator francis d k ching into a single volume introduction to architecture presents the essential texts and drawings of francis d k ching for those new to architecture and design with his typical highly graphic approach this is the first introductory text from ching that surveys the design of spaces buildings and cities in an easy to understand format readers will explore the histories and theories of architecture design elements and process and the technical aspects of the contemporary profession of architecture the book explains the experience and practice of architecture and allied disciplines for future professionals while those who love the beauty of architecture drawing will delight in the gorgeous illustrations included overview of the issues and practices of architecture in an all in one introductory text includes new chapters and introductory essays by james eckler and features more than 1 000 drawings throughout professor ching is the bestselling author of numerous books on architecture and design all published by wiley his works have been translated into 16 languages and are regarded as classics for their renowned graphical presentation for those pursuing a career in architecture or anyone who loves architectural design and drawing introduction to architecture presents a beautifully illustrated and comprehensive guide to the subject

illustrated 1914 edition excerpt pitch of the voice deeper this is also the reason why the races that are bred in the north are of vast height and have fair complexions straight red hair grey eyes and a great deal of blood owing to the abundance of moisture and the coolness of the atmosphere 4 on the contrary those that are nearest to the southern half of the axis and that lie directly under the sun's course are of lower stature with a swarthy complexion hair curling black eyes strong legs and but little blood on account of the force of the sun hence too this poverty of blood makes them overtimid to stand up against the sword but great heat and fevers they can endure without timidity because their frames are bred up in the raging heat hence men that are born in the north are rendered overtimid and weak by fever but their wealth of blood enables them to stand up against the sword without timidity 5 the pitch of the voice is likewise different and varying in quality with different nations for the following reasons the terminating points east and west on the level of the earth where the upper and lower parts of the heaven are divided seem to lie in a naturally balanced circle which mathematicians call the horizon keeping this idea definitely in mind if we imagine a line drawn from the northern side of the circumference n to the side which lies above the southern half of the axis s and from here another line obliquely up to the pivot at the summit beyond the stars composing the great bear the pole star p we shall doubtless see that we have in the heaven a triangular figure like that of the musical instrument which the greeks call the sambuca 6 and so under the space which is nearest to the pivot at the bottom off the

ever since anthropology has existed as a discipline anthropologists have thought about architectural forms this book provides the first overview of how anthropologists have studied architecture and the extraordinarily rich thought and data this has produced with a focus on domestic space that intimate context in which anthropologists traditionally work the book explains how anthropologists think about public and private boundaries gender sex and the body the materiality of architectural forms and materials building technologies and architectural representations each chapter uses a broad range of case studies from around the world to examine from within anthropology what architecture does how it makes people and shapes sustains and unravels social relations an anthropology of architecture is key reading for students of anthropology material culture geography sociology architectural theory design and city planning

this comprehensive analysis of the whole architectural phenomenon includes logical and methodical extraction of general principles from the prevailing pluralism of approaches

preface by kenneth frampton winner of the 1985 architectural critics award for the best book published on architectural criticism over the past three years since the early 1950s alan colquhoun's criticism and theory have acted as a conscience to a generation of architects his rigor and conceptual clarity have

consistently stimulated debate and have served as an impetus for the pursuit of new directions in both theory and practice this collection of 17 of his essays marks a watershed in the development of architectural thinking over the past three decades comprising a virtual theory of modernism in architecture in his earliest essays colquhoun concentrated on themes that for him comprised the modernist attitude in architecture language typology and the structure of form his stance since then has consistently been to try to relate these issues to current practice and to analyze the nature of architectural expression in relation to culture alan colquhoun divides his time between england where is is a principal in the firm of colquhoun miller and the united states where he is professor of architecture at princeton university an oppositions book

war and architecture is a timely and moving response by architect lebbeus woods to the bombing of sarajevo with text in both english and croatian accompanied by the author's exquisitely drawn hauntingly beautiful proposals the book is both dedicated and addressed to the citizens of this ravaged city lebbeus woods has long been fascinated by the intimate ties between architecture and violence he identifies the two predominant patterns for rebuilding cities following catastrophic destruction restoring the city exactly to its previous historical state or erasing the remains of the city to construct a new utopia these he argues are twin forms of denial woods draws an analogy to the process of biological and emotional healing presenting architectural forms that act as injections scabs scars and new tissue within the complex organism of a city only by facing the insanity of willful destruction he argues can reason begin to believe again in itself

an indispensable tool for the beginning stages of designing and planning a building project this new edition of a classic bestselling text provides in one concise volume the essential information needed to form the framework for the more detailed design and development of any building project organized largely by building type it covers planning criteria and considerations of function and siting and with over 6200 diagrams it provides a mass of data on spatial requirements most of the featured illustrations are dimensioned and each building type includes plans sections site layouts and design details the book also includes an extensive bibliography and detailed set of metric imperial conversion tables architects data starts with the basics of designing for a new building project before moving on to covering everything an architect needs to know it also looks at the design styles and specifications for creating different types of structures such as those made for residential religious cultural sports medical and other types of occupation covers user requirements planning criteria basic dimensions and considerations of function and siting includes numerous examples and over 6200 illustrations and tables 5th english edition of the classic international reference for architects architects data is an excellent resource for architects building surveyors space planners and design and build contractors everywhere

the book shows how architecture in norway has been shaped by resource availability changing social conditions and architectural style impulses through the centuries the book is thoroughly illustrated with photos ground plan drawings and isometric drawings this outline of norwegian architectural history provides the first comprehensive presentation of architecture in norway from tents and housing constructions in the stone age until contemporary architecture as the iconic contemporary opera house in oslo the book shows how norwegian vernacular architecture has been shaped by natural conditions and resources changing cultural situations and building traditions through the ages by implementing a view on how the cultivated and built landscapes of norway have been affected by human hands and creativity the authors give a contextual and interdisciplinary presentation of norwegian architecture history the authors show how the technological basis of iron age and medieval architecture was developed long before the construction of stave churches in the first part of the book recent research on building construction both in prehistoric times and during the middle ages are presented after an updated review of the architecture of early post medieval centuries the authors show how the repartition of land industrialization and urbanization transforms the landscape of the late 19th century major changes take place into the 1900s during the breakthrough of modernism with huge building activity for a new independent nation the book also presents new research on the most recent architecture in norway in particular the architecture of the 1980s 90s and 2000s the relations between vernacular architecture and contemporary architecture of different periods are dealt with through continuing discussions among the authors
